## THE CHALLENGE

GBM required to install a modern system, to increase the security of its facilities in a productive environment, without affecting the operation of the offices and the data center, which are carried out 24 hours a day, 7 days a week and maintaining the design guidelines of its facilities.

#### THE SOLUTION

Grupo COMUDISA with the support of Tech Geeks Solutions suggested to GBM to install an access control and visitor management system, through access equipment with different access technologies such as BioStation 2, X-Station 2, CoreStation controller with DM-20 expansions and XPass D2 RFID readers and to adapt to the specific needs of each access point, using BioStar 2 as the central management platform.

### **MAIN BENEFITS**

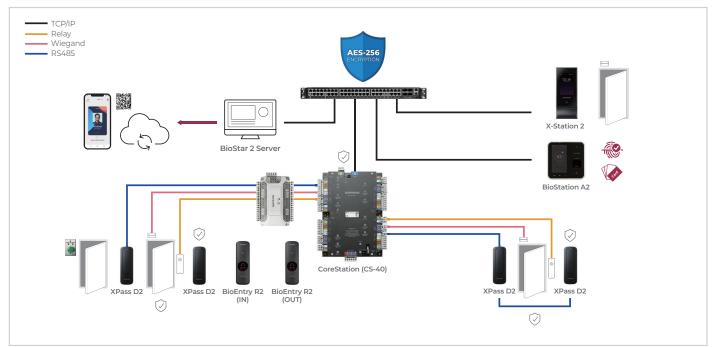

GBM managed to install a robust security system based on Suprema BioStar 2, high security and stability, with multiple means of access, a centralized, web-based and friendly administration, taking advantage of mobile access control for ease of use, with robust equipment that helped maintain the aesthetics of the site. The regional presence of COMUDISA Group allows the customer to have an after-sales service experience that meets their operational needs.
