

Suprema Middleware for Milestone XProtect

Suprema Middleware for Milestone XProtect brings physical security operations into a single interface. By bridging BioStar X access control with Milestone's XProtect VMS, security operators can monitor access events, manage alarms, and view live or recorded video — all from the XProtect Smart Client without switching between systems.

Empowering security and creating a comprehensive access control solution

Access Control	Management and administration for users, doors, zones, and elevators with XProtect Smart Client.
Event Log Management	View live and historical access control events from BioStar X within XProtect Smart Client. When a camera is mapped to a door, operators can instantly review the snapshot image or video footprint captured at the moment of the event — all from a single interface.
Alarm Management	Acknowledge the access control alarm of BioStar X in XProtect Smart Client.
Remote Door Control	Remote control the doors to unlock, lock and release the alarm.
Virtual Map	Open and close the doors through the Maps function of the XProtect Smart Client.

To implement this integration, you need :

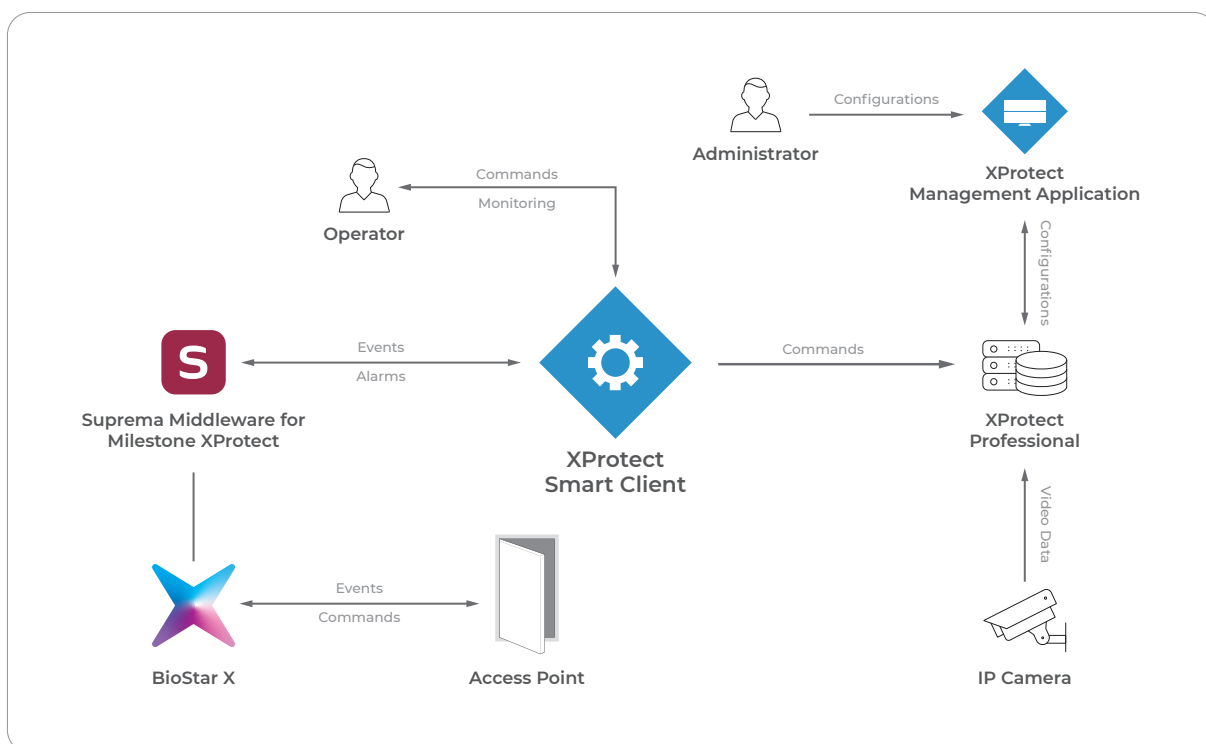

- XProtect Professional+ 2026 R1
- Suprema BioStar X 1.0.1 or higher
- Suprema Middleware
- Suprema Devices

Compatible Access Control Devices :

Available for all devices compatible with BioStar X
