Safety information

Please read this safety instructions before you use the product to prevent injury to yourself and others and to prevent property damage. The term ‘product’ in this manual refers to the product and any items provided with the product.

Instructional icons

- **Warning**: This symbol indicates situations that could result in death or severe injury.

- **Caution**: This symbol indicates situations that may result in moderate injury or property damage.

- **Note**: This symbol indicates notes or additional information.

### Warning

**Installation**

Do not install or repair the product arbitrarily.

- This may result in electric shock, fire, or product damage.
- Damages caused by any modifications or failure to follow installation instructions can void the manufacturer’s warranty.

Do not install the product in a place with direct sunlight, moisture, dust, soot, or a gas leak.

- This may result in electric shock or fire.

Do not install the product in a location with heat from an electric heater.

- This may result in fire due to overheating.

Install the product in a dry location.

- Humidity and liquids may result in electric shock or product damage.

Do not install the product in a location where it will be affected by radio frequencies.

- This may result in fire or product damage.

**Operation**

Keep the product dry.

- Humidity and liquids may result in electric shock, fire, or product damage.

Do not use damaged power supply adaptors, plugs, or loose electrical sockets.

- Unsecured connections may cause electric shock or fire.

Do not bend or damage the power cord.

- This may result in electric shock or fire.
Caution

Installation
Do not install the product under direct sunlight or UV light.
- This may result in product damage, malfunction, discoloration, or deformation.

Do not install the power supply cable in a location where people pass by.
- This may result in injury or product damage.

Do not install the product near magnetic objects, such as a magnet, TV, monitor (especially CRT), or speaker.
- The product may malfunction.

Operation
Do not drop the product or cause impacts to the product.
- The product may malfunction.

Do not store your product in very hot or very cold places. It is recommended to use the product at temperatures from 0 °C to 50 °C.
- The product may malfunction.

When cleaning the product, mind the following.
- Wipe the product with a clean and dry towel.
- If you need to sanitize the product, moisten the cloth or the wipe with a proper amount of rubbing alcohol and gently clean all exposed surfaces including the fingerprint sensor. Use rubbing alcohol (containing 70% Isopropyl alcohol) and a clean, non-abrasive cloth like lens wipe.
- Do not apply liquid directly to the surface of the product.

Do not use the product for anything other than its intended use.
- The product may malfunction.
## Introduction

- Components may vary according to the installation environment.
- Fixing screws for the enclosure, CoreStation, and the power supply cable are included in the ENCR-10 package. Use each screw correctly by following the details below.
  - Fixing screws for the enclosure (diameter: 4 mm, length: 25 mm) x 4
  - Fixing screws for the device (diameter: 3 mm, length: 5 mm) x 6
  - Fixing screws for the power supply cable (diameter: 3 mm, length: 8 mm) x 1
- The battery is sold separately.
Name of each part

**Outside**

- LED indicator
- CoreStation LED Status indicator & wiring guide label
- Battery mounting area
- Device mounting area
- Tamper switch
- LED board
- Power supply
- Power distribution board

**Inside**

- LED Status indicator & wiring guide labels are provided for CoreStation. For more information regarding Output Module or Input Module, visit the Suprema website (https://www.supremainc.com) and refer to the installation guide for the product.
Installation

This document describes how to install ENCR-10 and connect ENCR-10’s components and devices (CoreStation, Output Module, and Input Module). For details on other wiring for each device, visit the Suprema website (https://www.supremainc.com) and refer to the installation guide for the device.

- There is no optimal height for installing ENCR-10 on the wall. Install it to a safe and convenient location for you to use.
- Fixing screws for the enclosure, CoreStation, and the power supply cable are included in the ENCR-10 package. Use each screw correctly by following the details below.
  - Fixing screws for the enclosure (diameter: 4 mm, length: 25 mm) x 4
  - Fixing screws for CoreStation (diameter: 3 mm, length: 5 mm) x 6
  - Fixing screws for the power supply cable (diameter: 3 mm, length: 8 mm) x 1

Installing CoreStation

Securing the battery

Insert the battery velcro strap into the enclosure and secure the battery.

- Use a backup battery with 12 VDC and 7 Ah or higher. This product was tested with ‘ES7-12’ battery of ‘ROCKET’. It is recommended to use a battery corresponding to ‘ES7-12’.
• The battery is sold separately.
• If the dimension of the backup battery is larger than the recommended specification, it may not be able to be mounted in the enclosure or the enclosure may not close after it is mounted. Also, if the shape and dimension of the terminals are different, the battery cannot be connected using the cable provided.

Securing CoreStation

1. Check the position to install CoreStation in the enclosure.
2 After positioning CoreStation in the enclosure, fix it with the fixing screws.

**POWER / AUX IN Connection**

You can connect an Uninterruptible Power Supply (UPS) to prevent power failure. And a power failure detector or a dry contact output can be connected to the AUX IN terminal.
• Make sure to use separate power for the access control device and CoreStation.
• Use the correct power specifications (12 V, 3 A).
• Use a backup battery with 12 VDC and 7 Ah or higher. This product was tested with 'ES7-12' battery of 'ROCKET'. It is recommended to use a battery corresponding to 'ES7-12'.

For details on other wiring such as Ethernet, RS-485, Relay, and Wiegand, visit the Suprema website (https://www.supremainc.com) and refer to CoreStation installation guide.

For more information, contact the Suprema technical support team (https://support.supremainc.com).
Installing Output Module (OM-120)

Securing the battery
Insert the battery velcro strap into the enclosure and secure the battery.

- Use a backup battery with 12 VDC and 7 Ah or higher. This product was tested with ‘ES7-12’ battery of ‘ROCKET’. It is recommended to use a battery corresponding to ‘ES7-12’.

- The battery is sold separately.
- If the dimension of the backup battery is larger than the recommended specification, it may not be able to be mounted in the enclosure or the enclosure may not close after it is mounted. Also, if the shape and dimension of the terminals are different, the battery cannot be connected using the cable provided.
Securing Output Module

1. Check the position to install the Output Module in the enclosure. You can install two Output Modules in one enclosure.

2. After positioning the Output Module in the enclosure, fix it with the fixing screws.
POWER / AUX IN Connection

You can connect an Uninterruptible Power Supply (UPS) to prevent power failure. And a power failure detector or a dry contact output can be connected to the AUX IN terminal.

- Make sure to use separate power for the access control device and Output Module.
- Use the correct power specifications (12 VDC, 1 A).
- Use a backup battery with 12 VDC and 7 Ah or higher. This product was tested with 'ES7-12' battery of 'ROCKET'. It is recommended to use a battery corresponding to 'ES7-12'.

![Diagram of POWER / AUX IN Connection with connections and labels for 12V, GND, AUX IN 1, AUX IN 0, TRX+, and TRX- connections.]
**Tamper Connection**

If Output Module is detached from the installed location due to an external factor, it can trigger an alarm or save an event log.

- For details on other wiring such as RS-485 or Relay, visit the Suprema website (https://www.supreemainc.com) and refer to Output Module installation guide.
- For more information, contact the Suprema technical support team (https://support.supreemainc.com).
Installing Input Module (IM-120)

Securing the battery
Insert the battery velcro strap into the enclosure and secure the battery.

- Use a backup battery with 12 VDC and 7 Ah or higher. This product was tested with ‘ES7-12’ battery of ‘ROCKET’. It is recommended to use a battery corresponding to ‘ES7-12’.

- The battery is sold separately.
- If the dimension of the backup battery is larger than the recommended specification, it may not be able to be mounted in the enclosure or the enclosure may not close after it is mounted. Also, if the shape and dimension of the terminals are different, the battery cannot be connected using the cable provided.
Securing Input Module

1. Check the position to install the Input Module in the enclosure. You can install two Input Modules in one enclosure.

2. After positioning the Input Module in the enclosure, fix it with the fixing screws.
**POWER / AUX IN Connection**

You can connect an Uninterruptible Power Supply (UPS) to prevent power failure. And a power failure detector or a dry contact output can be connected to the AUX IN terminal.

- Make sure to use separate power for the access control device and Input Module.
- Use the correct power specifications (12 VDC, 130 mA or 24 VDC, 82 mA).
- Use a backup battery with 12 VDC and 7 Ah or higher. This product was tested with ‘ES7-12’ battery of ‘ROCKET’. It is recommended to use a battery corresponding to ‘ES7-12’.
Tamper Connection
If Input Module is detached from the installed location due to an external factor, it can trigger an alarm or save an event log.

- For details on other wiring such as RS-485, Supervised Input, or Relay, visit the Suprema website (https://www.supremainc.com) and refer to Input Module installation guide.
- For more information, contact the Suprema technical support team (https://support.supremainc.com).
